AN EFFECTIVE ALTERNATIVE TO ANTIBIOTICS AND CREAMS

The Alma Harmony utilizes its own proprietary pulsed light technology called Advanced Fluorescence Technology (AFT). AFT can improve inflammatory acne without the side effects associated with traditional acne medications.

AFT converts unused UV light into the optimal spectrum for a range of treatment applications. Intense blue wavelengths destroy the P/ Acne bacteria without damaging surrounding tissue.

HOW MANY TREATMENTS WILL I NEED?

Depending on the severity of your condition, you may require 8 treatments over a 4 week period.

HOW LONG DOES A TREATMENT TAKE?

Treatments times are generally only a few minutes.

WHAT KIND OF RESULTS WILL I SEE?

Most treatments show 80% or better acne clearance but results may vary from patient to patient.

Acne is a common condition that can begin in adolescence. However, **ADULTS CAN ALSO SUFFER FROM SKIN IMPERFECTIONS AND ACNE.** Whether a stray pimple or a full-blown outbreak, nearly everyone has suffered from acne at some time.

Pimples, cysts, and nodules can negatively impact our appearance whether they occur on the face, neck, chest, back, shoulders, and upper arms. When severe, acne can cause scarring if not properly treated. These conditions **DRAMATICALLY AFFECT ONE'S QUALITY OF LIFE AND SELF-ESTEEM.**
